

Welcome, from the TVEHA ACC!

The Architectural Control Committee (ACC) welcomes you to the neighborhood!

The ACC is charged in Article IV of the covenants with the responsibility of reviewing all proposals for the alteration, placement, erection, or making of any and all building or site improvements. For example, this includes fences, dog pens, decks, site grading, color schemes for repainting (if different from the original color), sheds, and exterior remodeling.

The approval process, as outlined in the covenants, involves written notification to the ACC of the proposed work. In order to submit for approval, homeowners need to complete the TVEHA Architectural Submission/Application Form (available on the TVEHA website) and submit per the instructions included on the form. The ACC will approve or disapprove the proposal in writing within 30 days of submission of the complete package. If no response from the ACC is received, the proposal is deemed approved.

If you have questions concerning the ACC roles, responsibilities, or submission of the TVEHA Architectural Submission/Application Form, please contact **Leverette Hoover** at 907-229-8711.
